

Job Description

Job Title: **Plater**

Reporting to: **Manufacturing Manager**

Responsible for the production of fabrications to agreed quality specifications and within times allowed. In achieving these requirements, the Plater will supervise welders and semi-skilled operatives (while under Plater's control) and liaise with Inspection personnel. From time to time the Plater may be a team member under the supervision of a Working Foreman or Chargehand.

Main Duties: -

- Check and produce cutting lists.
- Production of fabrications from engineering drawings.
- Produce pattern developments and templates, as necessary.
- Manufacture jigs, fixtures, and tooling to suit production.
- Use of tools to measure work and check work.
- Set and Operate: -

- CNC Pressbrake
- Power Rolls
- Guillotines
- Punching machines
- Drills
- Fusion Saw
- All common hand tools
- Centre Lathe
- MMA, MIG, TIG Welding Equipment
- Plasma and Oxy-fuel cutting equipment
- Fusion Bar welder

General Duties:

To abide by ALMOR's Works Rules and in particular to conform to acceptable standards of general conduct, attendance and time keeping, quantity and quality of work and workshop Health and Safety matters.

To recognise the role and authority of the Production Supervisor (where appropriate).
